

SHERIF AMR MAHMOUD AMER

Mobile Application Developer

Location: Giza, Egypt | **Phone:** +20 102 322 5772 | **Email:** sherifamer072@gmail.com

LinkedIn: /in/sherifamramer | **GitHub:** github.com/sherifammahmoud | **Portfolio:** Sherif Amer | Portfolio

SUMMARY

Computer Engineering graduate and Flutter Developer specializing in cross-platform mobile development using Flutter & Dart. Experienced in designing scalable applications with clean architecture, state management (Bloc/Cubit), and responsive UI development. Skilled in RESTful API integration, backend communication, and real-time data synchronization. Passionate about building maintainable, high-performance mobile applications with optimized user experience and clean software design principles.

EDUCATION

Misr University for Science and Technology (MUST)

B.Sc. in Computer and Software Engineering

Giza, Egypt

2020 – 2025

- **GPA:** 3.09

TECHNICAL SKILLS

Mobile Development : Flutter, Dart, Cross-platform development, Clean Architecture, State Management (Bloc/Cubit), Responsive UI, Reusable Components, RESTful APIs, Firebase, Hive, Postman

Frontend Development : HTML5, CSS3, JavaScript (Fundamentals), Bootstrap, Responsive Web Development

UI/UX : Figma, Wireframing, Prototyping, Mobile App UI Design, User-Centered Design, User Flow, Usability Testing, Personas, Journey Mapping, Empathy Mapping

Programming Languages : Dart, Python

Tools & Technologies : Git, GitHub, Linux, Firebase

PROJECTS

Healthy Meal & Recipe App

- Developed a scalable cross-platform application using **Flutter & Dart**, focusing on clean UI architecture and reusable component design.
- Implemented efficient state management using **Bloc/Cubit** to ensure a highly maintainable, modular, and testable codebase.
- Engineered a Favorites system with local persistence to enable seamless user interaction and offline accessibility.
- Integrated **RESTful APIs** for dynamic content delivery, utilizing **Postman** for rigorous API testing and system validation.
- Structured navigation and routing to improve app scalability, providing a responsive experience across various screen sizes.

Medicall (Medical Consultation App)

- Developed a scalable cross-platform **Flutter** application following **Clean Architecture** principles
- Implemented state management using **Bloc/Cubit** for maintainable and modular design
- Used **Firebase** for **Authentication** and cloud database management
- Integrated **RESTful APIs** for backend communication and **real-time data synchronization**
- Designed **responsive UI** ensuring smooth user experience across devices

Smart Real-Time Attendance System (Graduation Project)

- Developed a **responsive web frontend** for a smart attendance system enabling real-time user interaction
- Collaborated on integrating **computer vision models (YOLOv11 & FaceNet)** for face detection and recognition
- Collaborated on system integration, testing, and **performance optimization** between frontend and AI components
- Implemented **real-time data flow** and optimized system responsiveness and performance
- Graduation Project rated **Excellent** and selected among top university projects

To-Do App (Task Management Application)

- Developed a responsive task management app focused on clean UI/UX and robust performance.
- Implemented intuitive task tracking and **swipe-to-dismiss** functionality using the **Dismissible** widget.
- Applied efficient state management via **Bloc/Cubit** to ensure a highly maintainable and scalable codebase.
- Implemented full **CRUD operations** (create, update, delete, track tasks) with seamless data handling.
- Focused on responsive design to deliver a smooth and consistent user experience across all devices.

BMI Calculator App

- Developed a health utility application using **Flutter** with a focus on clean and interactive UI/UX.
- Implemented BMI calculation logic using **Bloc/Cubit** for robust state management and separation of concerns.
- Designed a fully **responsive interface** using custom Flutter widgets to ensure a consistent experience across different screen sizes.
- Integrated real-time data processing to provide instant health feedback based on user inputs.

TRAININGS

National Telecommunication Institute (NTI) <i>Flutter Mobile Development Trainee</i>	Feb 2026 – May 2026
Orange Digital Center (ODC) <i>UI/UX Design Trainee</i>	Jan 2026 – Feb 2026
Huawei Egyptian Talents Academy & NTI <i>Cloud Computing Trainee</i>	Jan 2025 – Mar 2025
Orange Digital Center (ODC) <i>DevOps Trainee</i>	Sep 2024 – Nov 2024
Telecom Egypt (WE) <i>Frontend Development Trainee</i>	Jun 2024 – Jul 2024
Telecom Egypt (WE) <i>Networking Trainee</i>	Sep 2023 – Oct 2023

SOFT SKILLS

Teamwork • Communication • Problem Solving • Time Management • Creativity • Collaboration
